LinkedIn: linkedin.com/in/sulaimon-odeniran-112476227/

Design Engineer with 4+ years of experience designing and shipping web and mobile products across fintech, AI and real estate. I focus on solving the underlying business problem first, then building something clear, fast and easy to use. I work from Figma to production in React, Next.js and Supabase, so ideas move from design to a live product without a handoff gap.

Tools

Product Design: Figma · Sketch · Adobe suite · Miro
Front end: HTML · JavaScript · React · Next.js · Tailwind CSS · SwiftUI
No Code: Framer · Webflow
Backend and deployment: Supabase · Vercel · Netlify
Prototype: Rive · Protopie
AI-assisted workflow: Claude · Cursor · Figma Make · Deepseek

Skills

Design-to-code execution · Design systems · End-to-end ownership · Shipping a real product · Wireframing · Motion · User research and testing · Leadership

Experience

Design Engineer

Jan 2026 – Aug 2026
Rehive
Full-time

- Designed and developed client-facing websites for a stablecoin neobank platform, building them with **React**, **HTML** and **Tailwind CSS** from **Figma** designs.
- Created website designs that supported sales efforts and helped win new clients for the platform.
- Redesigned the Rehive Pay mobile app and website screens, improving the clarity of payment and account flows.
- Worked across design and code, taking work from **Figma** to live pages without a separate handoff (**design-to-code execution**).
- Built responsive interfaces for a product used in 100+ countries, with multi-currency accounts and local payment rails (ACH, SEPA, SPEI, Pix).

Designer & Web Developer

Aug 2024 – Jul 2026
Hypergrowth
Full-time until Jan 2026

- Designed and built responsive websites and digital products for clients across multiple industries, including fintech, AI and real estate, using **Webflow** and **Framer**, from discovery and **wireframes** to launch.
- Owned the full process alone: user flows, UI design, development, responsive testing and handoff (**end-to-end ownership**).
- Worked with clients and stakeholders to turn business goals and user needs into clear page structure, messaging and conversion-focused layouts.
- Created **design systems** and reusable components (typography, color, spacing, buttons, sections) to keep every project consistent and make future pages faster to produce.
- Built content templates so non-technical team members and clients could update pages themselves without breaking the design.
- Translated rough briefs and early ideas into wireframes and prototypes, then refined them through feedback with stakeholders before development.
- Tested every build across devices and screen sizes, and fixed layout, performance and usability issues before launch.

UI/UX Designer

Dec 2023 – Jul 2024
Cimpla
Full-time

- Sole product designer at a pre-launch startup, owning UI/UX from concept and **wireframes** to final screens and developer handoff.

LinkedIn: linkedin.com/in/sulaimon-odeniran-112476227/

Experience

UI/UX Designer

Dec 2023 – Jul 2024

Cimpla

Full-time

- Designed the web app for a decision-engine platform, including project and folder management, a visual decision-tree builder, a code editor and 2D matrix tools.
- Designed Finparse, a financial-statement processing product: statement upload and status tracking, searchable and filterable data tables, and a wallet view with transaction history and exports.
- Designed the company website (product page, careers, FAQ, blog) with demo-booking calls to action.
- Built the **design system** (typography, color scales, reusable components, loaders and logo variations) shared across the website, web app and Finparse, keeping all three consistent.

Junior UI/UX Designer

May 2023 – Dec 2023

EtherealDesign Studio

Full-time

- Created **wireframes** and low-fidelity layouts to map out screens and user flows before moving into visual design.
- Built interactive **prototypes** in **Figma** and **Sketch** to show how screens connected and to test interactions with the team.
- Designed UI screens for client projects, applying consistent typography, color and spacing across pages.
- Took part in design reviews and iteration cycles, turning feedback from senior designers and clients into improved layouts and user flows.
- Prepared design files for handoff, organizing layers, components and screens so developers could work from them.
- Worked in a studio team environment, learning the full design process from early concept through to final delivery.

UI/UX Design Intern

Nov 2022 – Apr 2023

GoPay

Full-time

- Designed mobile and web app interfaces for a digital payments product, creating clear, easy-to-use layouts for payment experiences.
- Worked with designers, developers and product managers in sprints and brainstorming sessions, turning product needs into screens and user flows.

Personal Projects

Samaa: Quran verse recognition app

Live on iOS and Android | samaaapp.com

Designed, built and launched a mobile app that identifies any Quran recitation in seconds, showing the Surah and Ayah with translation and transliteration as it plays. **Shipped** on the App Store and Google Play with a free tier and a Premium subscription that unlocks unlimited recognition and offline downloads.

Growvest: investment app for small businesses

SwiftUI, React, Figma

Designed and built an interactive iOS **prototype** for an app where people invest in small businesses and business owners list to raise funds. It covers an investor and business-owner dashboard, buying and selling shares with PIN and Face ID confirmation, KYC identity verification (ID scan, face check, address), and role-based profile setup.

Education

Self-directed training in UI/UX design and front-end development through online courses, a design bootcamp and one-on-one mentorship (2021 – 2022)
B.Sc in Microbiology, OOU.
